

# STARLIGHT

## Roll-off done right...with real-time data

This is the first time software was built **exactly right** for roll-off, and it really makes a difference. Starlight enables roll-off haulers to **maximize customer service** AND profit through better employee efficiency and much higher truck and container productivity.

**Bill Bradley**, Starlight CEO, is also a roll-off hauler with **33 trucks** and **1600 cans**. Bill designed and built Starlight to be exactly right for roll-off. Using Starlight at 5280 Waste, average miles per haul decreased by 13%, and paid hauls per driver per day increased by 20%!

*"This software runs your whole business. It's absolutely worth it."*

Brian Meister  
Scissortail Waste Solutions,  
Oklahoma City

*"Everything we were told we were buying, we've gotten and probably more so."*

Joshua Fookes  
Bee Green, Oakland

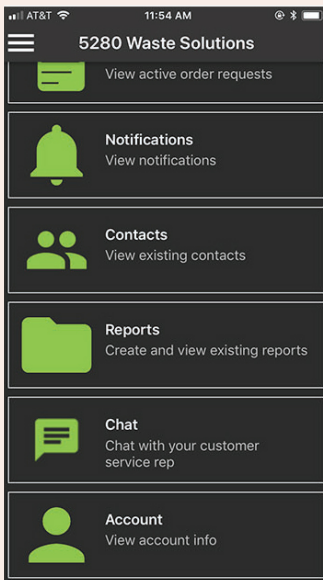

*"We can get more orders throughout the day out to our customers. Customer service has absolutely been phenomenal."*

Shane Magennis  
GreenWaste of Sacramento

**Roll-off  
Done Right  
means:**

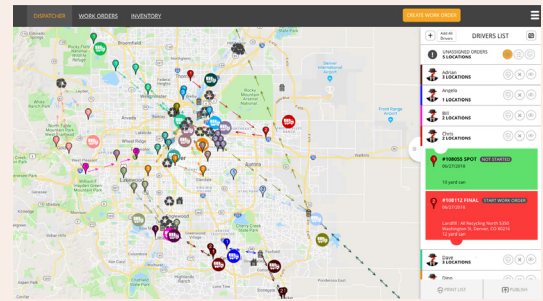

- 20% more orders per truck per day
- Superior customer service
- Simple, easy to use map-based dispatch
- Faster order entry – Fewer missed calls
- Take orders and payments from website and mobile app
- 100% accurate inventory by day, size and location
- Automatic capture of billing data
- Automatic customer notifications
- More automation – Less data entry

### Contractor Mobile App

- Submit orders 24/7; stored account information
- Store multiple jobsite addresses and credit cards
- See invoices and statements
- Pay by credit cards on file or "on account"

### Map-Based Visual Dispatch

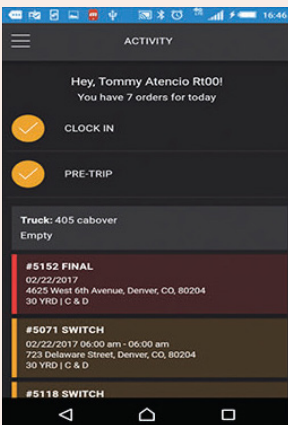

- Drag and drop route setup
- Easy same-day orders
- 10-20% increase in hauls per truck
- Balance driver workloads; minimize driver overtime
- Assign work orders and changes to drivers in real-time
- Driver status and location in real-time

### Customer Order & Billing System

- Client profiles with custom pricing
- Integrates with QuickBooks
- Integrated billing and invoicing
- Accept and reconcile checks and credit cards
- Print and email statements and reports
- Website order integration
- Credit limits and finance charges

### Recycling Center Module

- Integrates with truck scales
- Integrates with material sorting tablets
- Integrates with hauling software
- Integrates with QuickBooks

### Driver Mobile App

- Automatic capture of billing data
- Display customer photos for container placement
- Take driver notes and capture photos
- GPS-based locations and arrival times
- Automatic order-on-way text messages
